

DAY 1 — Computer Basics + Introduction to Programming

Goal:

Understand what a computer is and what programming actually means.

Questions to Learn

1. What is a computer?
2. What is hardware?
3. What is software?
4. What is a CPU?
5. What is RAM?
6. What is storage?
7. What is an Operating System?
8. What is programming?
9. What is coding?
10. What is a programming language?
11. What is Python?
12. Where is Python used?

Free and Easy Platforms

YouTube

Search:

“Computer Basics for Beginners”

W3Schools

For basic programming concepts.

Click the link :  [W3Schools](https://www.w3schools.com)

Task for Day 1

Write very short notes about:

- CPU

- RAM
- Hardware
- Software
- Operating System
- Programming

Do not try to memorize everything. Just understand the basic concepts.

DAY 2 — Start Learning Python

Goal:

Write and run the first programs.

Questions and Topics to Learn

1. What is Python?
2. How do you run a Python program?
3. What is `print()`?
4. What is a variable?
5. What is `input()`?
6. What are data types?
7. What is an integer?
8. What is a string?
9. What are operators?
10. What is `if` and `else`?

Practice Programs

Try creating these programs:

1. Print **Hello World**
2. Print your name
3. Add two numbers
4. Find whether a number is Even or Odd

5. Check whether a student Passes or Fails
