

CONFIDENTIAL — MINISTRY OF DEFENCE

SUBJECT: STRATEGIC CYBER DEFENCE DIRECTIVE 2026

This document outlines post-quantum cryptographic standards, immutable provenance logging, and forensic watermarking protocols for classified document distribution across defence networks.

1. All classified document distribution must encapsulate content keys using NIST ML-KEM-768.
2. Authorized officer decryptions require mandatory ML-DSA digital signatures and offline provenance logging.
3. Watermark identifiers are recipient-specific and cryptographically verifiable.

CLASSIFICATION: SECRET / EYES ONLY
